

Projektauftrag: Musterprojekt

Projektname:	eiBoard
Projektnummer:	Ei2022
Projektauftrag	
Ausgangslage	The eiBoard Company is an interactive online planner dashboard. It is supposed to implement the lecture schedule from Rapla. Users will be able to keep track of their appointments, assignments, homework, final exam dates and more. Users will be notified when an appointment is coming up.
Projektziele:	<p>What we want to achieve:</p> <ol style="list-style-type: none"> 1. Start Dashboard: The dashboard is the essential part of the user interface. When a user opens the app he will be up to date with all that's going on in their schedule, tasks, and exams. The data must be stored accordingly. 2. Account System: Users can create an account for their personal calendar. It should be possible to get the timetable from rapla to make the app more user friendly. User data must be stored alongside the posting data. 3. Storing Data: User data for accounts and possibly profiles has to be stored. The data storage will form the foundation for the visualization, account system and the search feature.
Abgrenzungen:	The eiBoard is an interactive online planner. Nothing more, nothing less.
Meilensteine	Siehe Phasen und Meilensteinplan
Termine	Implementierung Phase I (12.12.2022), Implementierung Phase II (23.01.2023), Auslieferung (20.02.2023)
Kosten	Mitarbeiterkosten (20 Euro pro Stunde), Kosten für Server um App zu veröffentlichen
Personenaufwand	213 Std. entsprechen ca. 4260 Euro.
Sachmittel	Es werden Laptops und Internetzugang benötigt.
Projektorganisation	
Auftraggeber	eiCompany. Internes Produkt.
Projektleiter	eiBoard-Team
Projektmitglieder	Entwickler und Projekt Owner: Eileen, Matteo, Niklas, Julian, Marius
Projektausschuss	Nuo, Eileen, Matteo, Niklas, Julian, Marius
Verteiler	Nuo, Eileen, Matteo, Niklas, Julian, Marius, diverse tinf21 Kursmitglieder
